

OPTI-LOOP™

HORSE-SHOE

MINI SHOE FOR FTTP AND FTTH STORAGE APPLICATIONS

The Opti-Loop Mini-Shoe was designed to store and organize the small amount of slack from a fiber drop that is to be left at an FDT. It is also to be used for the organization or storage of the minimal amount of unused multi-fiber drop, in the placing of a multi-port terminal from VATS splices. Additionally, the remaining cable left for future use is safely stored, as opposed to the slack hanging in a vertical coil. This procedure stores the coil in a more unobtrusive, horizontal fashion.

DESIGN FEATURES AND BENEFITS

- Lightweight and stackable, tough plastic compound and aluminum models
- Keyed bracket slot, to prevent twisting
- Optional, changeable, mounting hardware for aerial, pole or below-grade hand holes
- Water resistant, non-rusting
- One tool, one bracket mounting
- No ty-wraps required
- Future drops can be added without disturbing the original bundle
- No coiling of the fiber drop
